

To achieve the best possible results, wash the clothing you wish to treat with Nikwax® Tech Wash®. Do not dry material prior to impregnation. Follow the instructions of use on the label. Shake before use.

Use:

1. Prepare a working area and spread out the clean, damp tent or other material.
2. Use the sprayer or pulveriser to cover larger areas.
3. Do not dilute.
4. Evenly spread the product on the material.
5. Wait for 2 minutes. Remove product leftovers with a moist cloth.
6. Make sure that the whole material surface is covered.

Drying

Dry in open air. After several minutes remove product leftovers with a moist cloth.

Consumption:

Two people tent - 300 ml

Three to four people tent -500ml

Family tent - 1L

Provided product amount is approximate and depends on the quality of the material to be treated.

To retain water resistant qualities, use only Nikwax® Tech Wash® for washing treated materials. Do not use other washing products (detergents).
